TradeBot Master Blueprint **Doküman 1 — Master Blueprint**
Amaç: SMC tabanl■, kural bazl■, risk kontrollü, TradingView destekli, Python tabanl■, backtest edilebilir, paper trade edilebilir ve canl■ trade edilebilir sistem geli■tirmek.

Ba■ar■ Kriterleri
- Profit Factor > 1.3
- Expectancy > 0
- Drawdown < 15%
- En az 300 paper trade
- En az 100 testnet trade

Ba■ar■s■zl■k Kriterleri
- PF < 1
- DD > 20%
- 3 ay üst üste negatif performans

Doküman 2 — Knowledge Base
knowledge/risk-management
knowledge/market-structure
knowledge/liquidity
knowledge/fvg
knowledge/order-blocks
knowledge/volume
knowledge/sessions
knowledge/economic-events
knowledge/execution
knowledge/backtesting
knowledge/strategies

Her klasörde:
concept.md
examples.md
implementation.md
mistakes.md

Doküman 3 — Strategy Bible
■lk strateji: HTF Bias + Liquidity Sweep + FVG Retest
Her strateji için teori, giri■ kurallar■, ç■k■■ kurallar■, yasak durumlar, örnek grafikler, PineScript mant■■■ ve backtest sonuçlar■ tutulur.

Doküman 4 — Pine Script Handbook
barstate.isconfirmed zorunludur.
Repainting yapan yap■lar yasakt■r.
Webhook JSON standard■ tan■mlanmal■d■r.

Doküman 5 — System Architecture
TradingView -> Webhook -> FastAPI -> Queue -> Risk Engine -> Execution Engine -> Exchange -> Journal

Teknolojiler:
Python, FastAPI, SQLAlchemy, PostgreSQL, Redis, CCXT Async

Doküman 6 — Database Design
Trades, Signals, Journals ve Statistics tablolar■.

Doküman 7 — Backtest Protocol
Curve fitting yasak.

Future data leak yasak.
Commission, spread ve slippage zorunlu.
Profit Factor, Win Rate, Drawdown, Expectancy ve Sharpe ölçülür.

Doküman 8 — Risk Engine
Risk Per Trade: %0.5
Daily Limit: -3R
Weekly Limit: -8R
Max Drawdown: %10

Doküman 9 — Journal System
Her i■lem için giri■, ç■k■■, neden, screenshot ve score saklan■r.

Doküman 10 — AI Analyst Layer
Claude performans analizi, raporlama ve optimizasyon önerileri yapar. Canl■ trade karar■ vermez.

Doküman 11 — VPS Deployment
Ubuntu, Docker, Docker Compose, PostgreSQL, Redis, Nginx, Let's Encrypt, Grafana ve Prometheus.

Doküman 12 — Development Plan
Ay 1: Knowledge Base, SMC Research, PineScript, Backtest
Ay 2: Paper Trading, Journal, Risk Engine, Optimization
Ay 3: FastAPI, PostgreSQL, CCXT, Testnet
Ay 4: Canl■ küçük sermaye, performans ölçümü, iyile■tirme, ölçekleme

Ek Dokümanlar
1. Error Handling Handbook
2. Security Handbook
3. Operations Runbook
4. Optimization Framework
5. Multi-Strategy Framework (V2)
